A Massive Open Online Course (MOOC) is an online course aimed at unlimited participation and open access via the Web.

What is a MOOC?

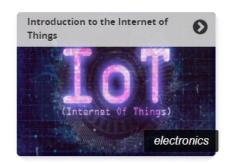

The platform UPV[x]

The MOOC "Management of Marginal Lands and Carbon Sequestration estimation through Remote Sensing and GIS"

MLs

Definition of MLs

MLs concerns and policies

The classification of MLs over time

Datasets used for characterization of MLs

Remote sensing basics

Sentinel 2

Sentinel 1

Lidar

Map of Marginal Lands in Europe

Carbon calculator

Carbon predictor

Afforestation cost

Multi-temporal Marginal Lands analysis

1. Definition & descriptions of MLs

2. Identification & classification of MLs

3. Biomass estimation from remote sensing data

4. Carbon storage and accounting

5. GEE-based platform for MLs management

Overall approach for the identification and classification of

Structure

Hard Layers for identifying MLs

Soft constrains: Definition and processing

The ML classification scheme in the MAIL project

Direct Methods for carbon storage and accounting

Indirect Methods for carbon stora ge and accounting

IPCC accounting rules

Identifying Marginal Lands in Europe and strengthening their contribution potentialities in a CO₂ sequestration strategy

Mail Massive Open Online Course (MOOC)

Identifying Marginal Lands in Europe and strengthening their contribution potentialities in a CO2 sequestration strategy

MaiL Massive Open Online Course (MOOC)

Join the MOOC!

From the second half of December

Thank you for your attention!
